# PROJECT TITLE

MeloMix: Redefining Music  
Streaming Through Adaptive  
Mood Intelligence

## GOAL

Design a next-generation music streaming experience that dynamically adapts to the user's real-time mood, activity, and environment — creating a deeper emotional connection and sustained engagement.

# IDEA

The user interface is **clean** and **minimalistic**, offering simple navigation with a well-organized layout for effortless browsing. Its visually appealing design uses subtle, vibrant elements to create an elegant and **distraction-free experience**.

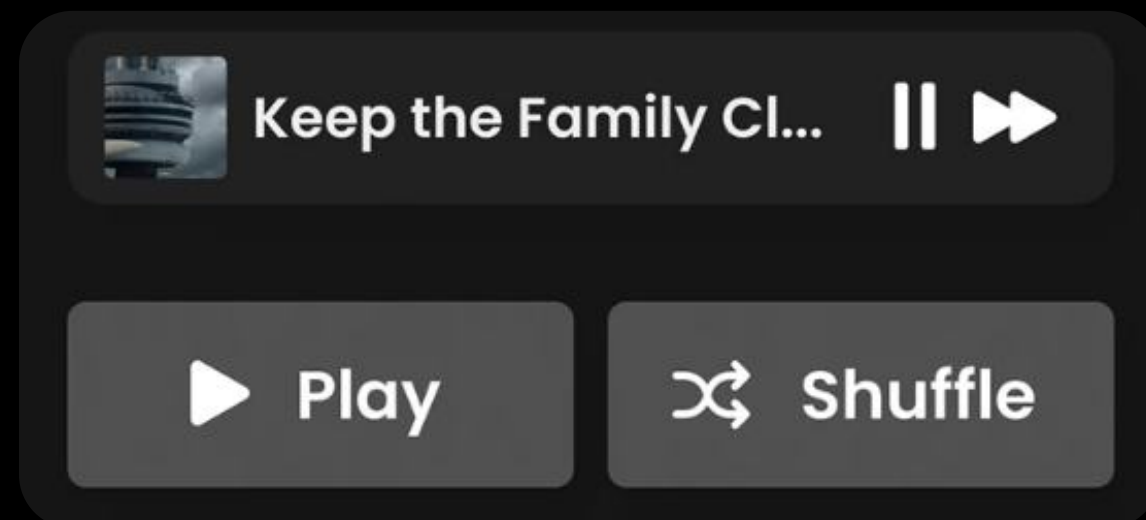

## TARGETED CUSTOMERS

**Music lovers** that look for a clean UI design and want very simple usability of the app.

“How might we design a **music streaming experience** that evolves in real-time with the **user’s emotions, context, and activities** — creating a truly adaptive and engaging environment?”

# PROBLEM SOLUTION

**MeloMix** uses AI-driven mood detection and contextual sensing (via **facial cues, wearable data, and smartphone sensors**) to adjust playlists dynamically — blending user control with intelligent adaptation.

# QUALITATIVE DATA

# USER NEEDS

- Easy access to favorite songs and playlists.
- Smooth and fast search for songs, artists, and albums.
- Personalized recommendations based on listening habits.
- High-quality audio streaming without interruptions.
- Offline listening for downloaded music.
- Create and manage custom playlists easily.
- Share songs and playlists with friends.

# PROBLEM STATEMENT

## Why Melomix is Unique (Value Points)

- AI-based mood playlists (study, sleep, travel, gym).
- Low data mode + offline music downloads.
- Personalized "Melomix Daily Mixes".
- Simple, smooth interface.
- Artist upload + analytics feature.
- Collaborative and shareable playlists.

## User Emotions

- Happy when they find the right playlist.
- Frustrated with buffering and ads.
- Curious while exploring new songs.
- Excited to share music with friends.
- Hopeful (for artists) when their songs reach listeners.

## User Needs

- Easy music search and discovery (mood, genre, activity-based).
- Fast streaming with no buffering.
- Offline songs + low data usage.
- Simple and clean UI.
- Personalised playlists / mixes.
- Easy playlist sharing and collaboration.
- Platform for new/independent artists to upload music.

## User Pain Points

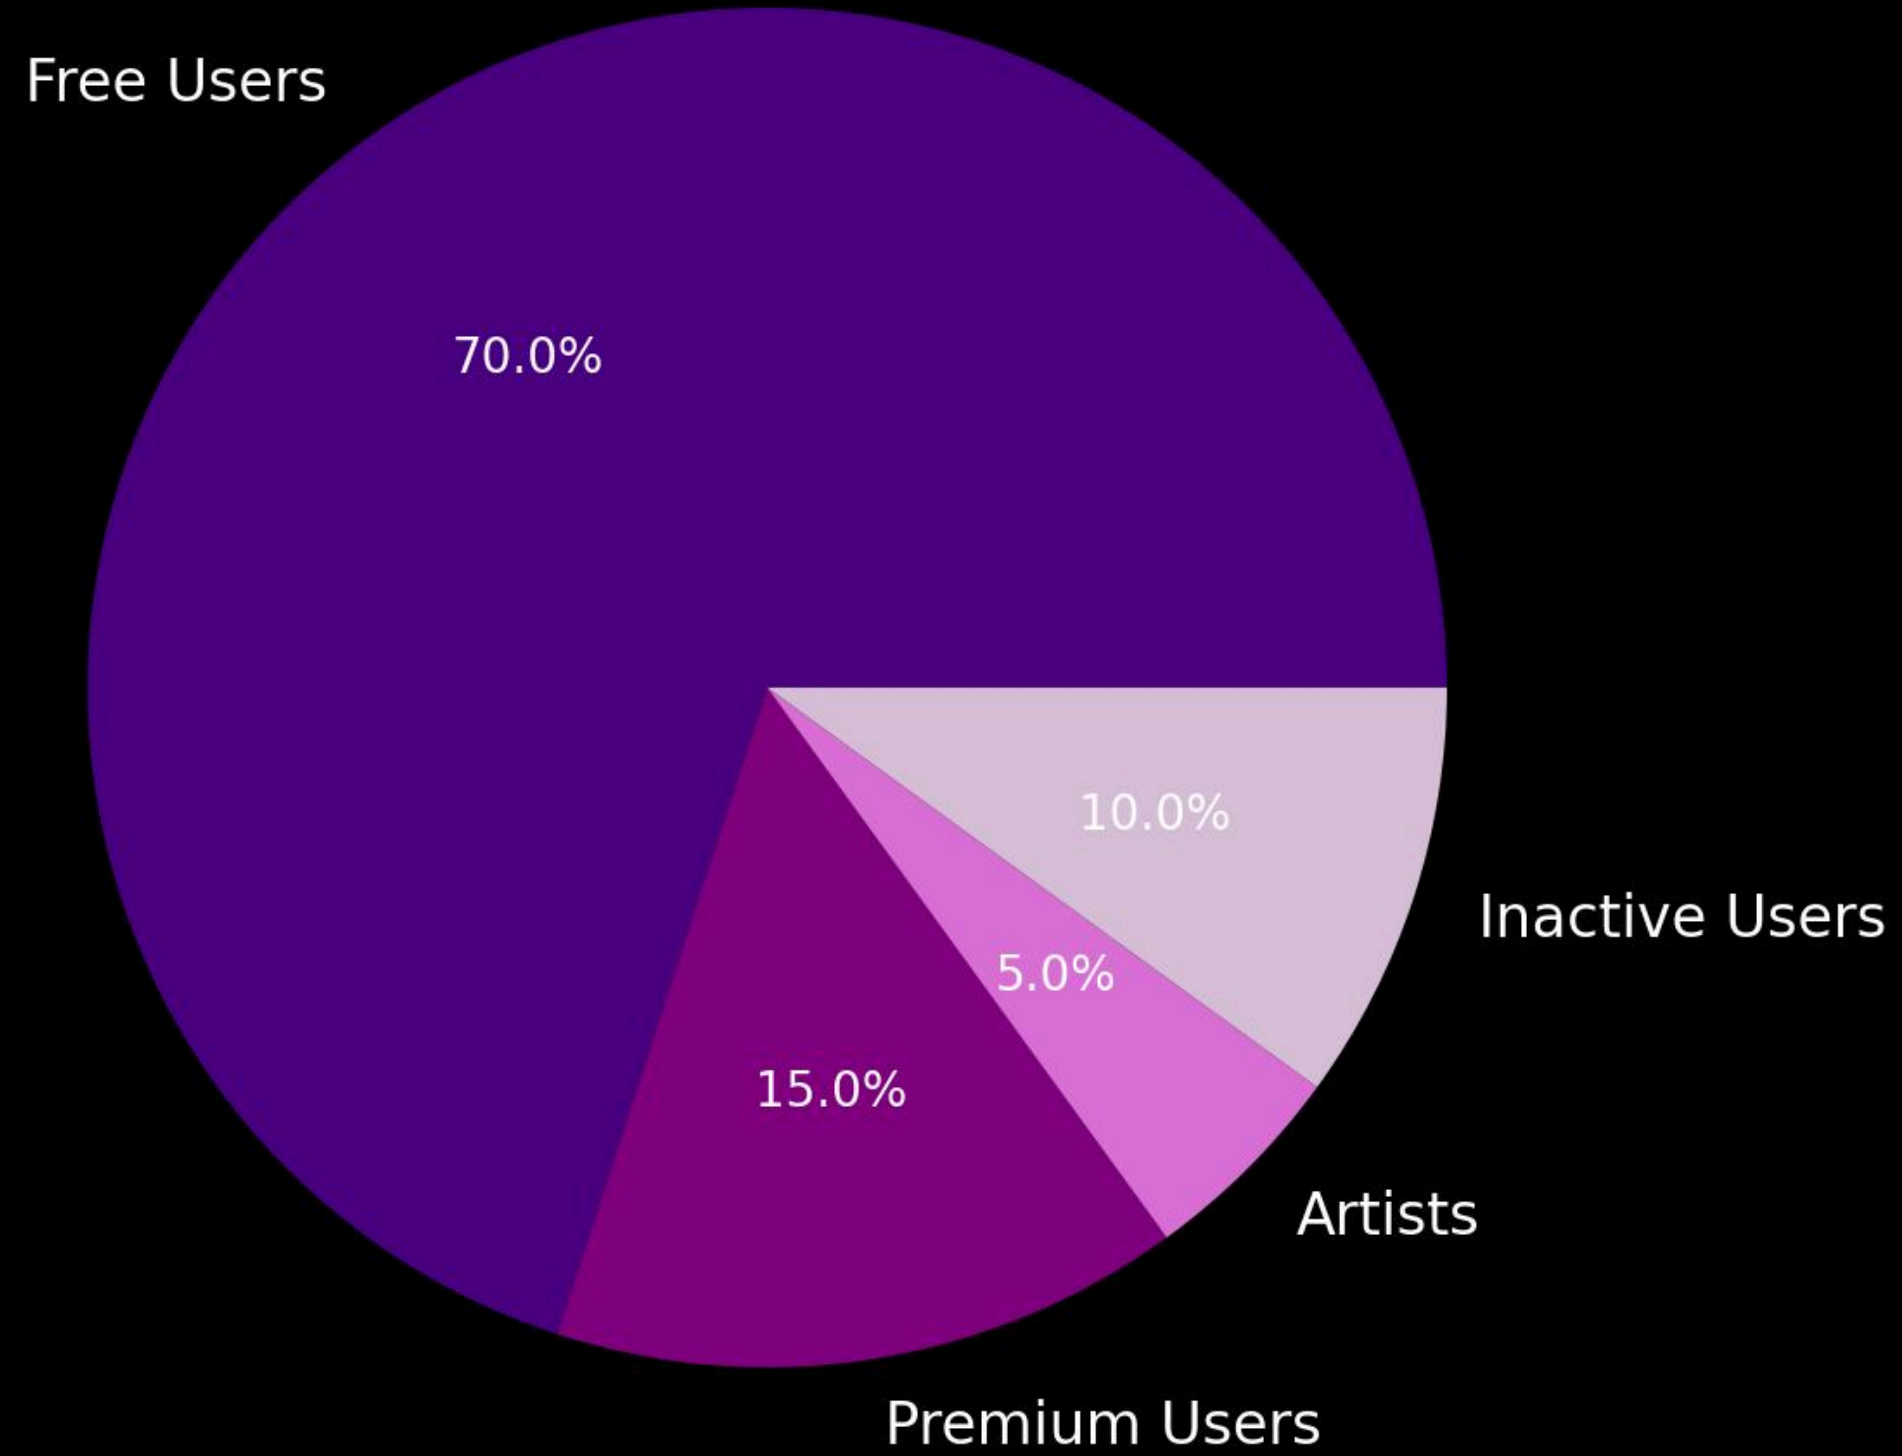

- Too many ads in other apps.
- High data usage and buffering.
- Hard to find mood-based music quickly.
- Complicated UI in existing apps.
- Independent artists get less visibility.

# QUANTITATIVE DATA

| USER           | TYPE | PERCENTAGE | FREE |
|----------------|------|------------|------|
| FREE USERS     |      | 70%        |      |
| PREMIUM USERS  |      | 15%        |      |
| INACTIVE USERS |      | 10%        |      |
| ARTISTS        |      | 5%         |      |

## User Distribution on Melomix

**USER**

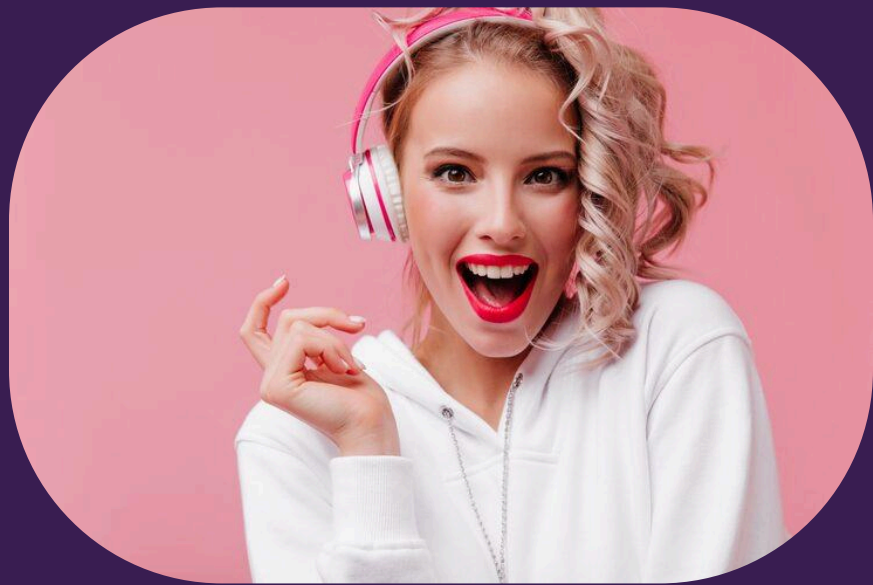

# PERSONAS

## Persona A — “Arun, the University Student”

- Age: 20
- Occupation: 2nd-year engineering student
- Location: Chennai (urban)
- Tech comfort: High (mobile-first)
- Goals: Focused playlists for studying, discover indie artists, share playlists with friends.
- Frustrations: Ads interrupting concentration, data-heavy streaming, clumsy search.
- Devices: Android phone (mid-range), occasional laptop.
- Key features he loves: Study mode playlists, offline low-data downloads, collaborative playlists.

Empathy map — Arun

# Says

"I need playlists for focus and for parties."

# Thinks

"I want music that matches my mood without wasting data."

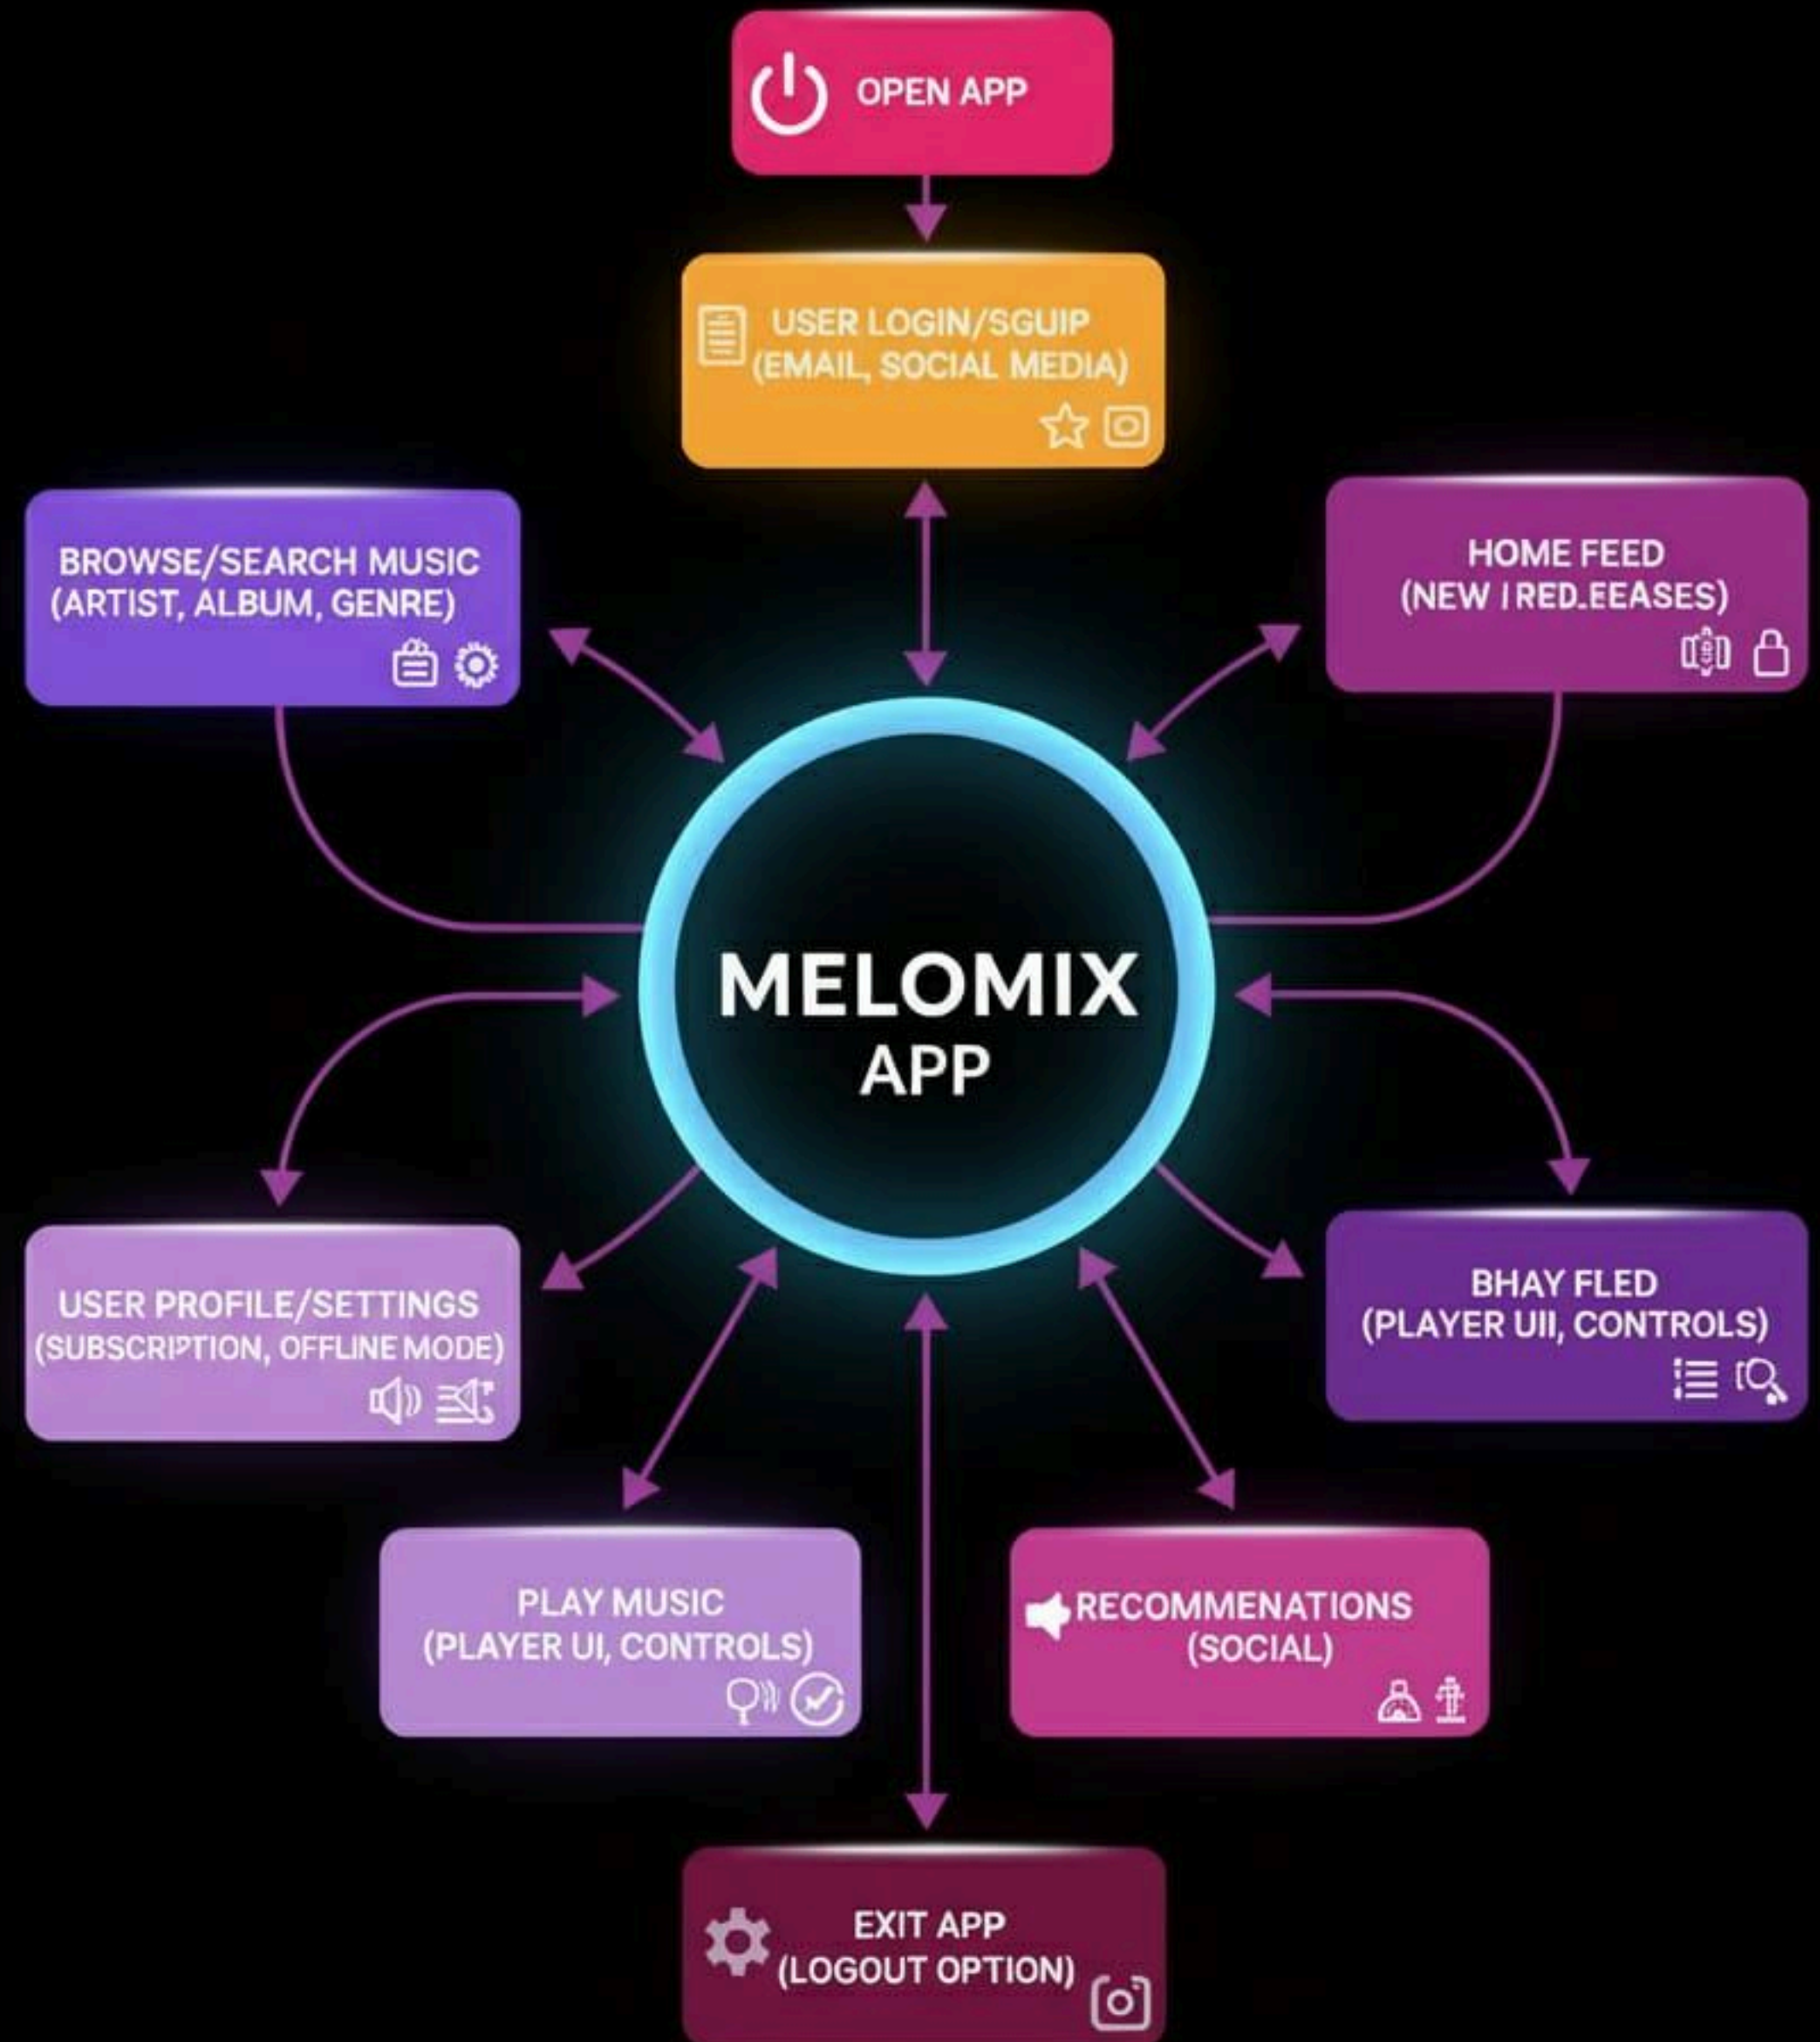

# Feels

Frustrated by buffering;  
delighted by perfect mood  
playlists

# Does

Uses app while studying, in  
transit; creates playlists; shares  
on WhatsApp
